

Multiplication

Steady / Show your thinking. Write each final answer in its box.

1. There are 3 supply crates. Each crate holds 6 batteries. How many batteries are there altogether?

A1:

2. There are 3 supply crates. Each crate holds 4 batteries. How many batteries are there altogether?

A2:

3. There are 12 supply crates. Each crate holds 4 batteries. How many batteries are there altogether?

A3:

4. There are 2 supply crates. Each crate holds 10 batteries. How many batteries are there altogether?

A4:

Multiplication

Steady / Show your thinking. Write each final answer in its box.

5. There are 2 supply crates. Each crate holds 11 batteries. How many batteries are there altogether?

A5:

6. There are 6 supply crates. Each crate holds 12 batteries. How many batteries are there altogether?

A6:

7. There are 2 supply crates. Each crate holds 12 batteries. How many batteries are there altogether?

A7:

8. There are 11 supply crates. Each crate holds 4 batteries. How many batteries are there altogether?

A8:

Multiplication

Steady / Show your thinking. Write each final answer in its box.

9. There are 6 supply crates. Each crate holds 7 batteries. How many batteries are there altogether?

A9:

10. There are 10 supply crates. Each crate holds 9 batteries. How many batteries are there altogether?

A10:

11. There are 6 supply crates. Each crate holds 10 batteries. How many batteries are there altogether?

A11:

12. There are 3 supply crates. Each crate holds 7 batteries. How many batteries are there altogether?

A12:
